

# Requirement Analysis Document (RAD)

## Project Title: Yusuf Bhai Perfume E-Commerce Website

**Student Name:** SYEDISMAIL

**Register Number:** ASML25024

### 1. Executive Project Summary

The Yusuf Bhai Perfume website is an online perfume shopping platform designed to provide customers with a secure and convenient shopping experience. Customers can register, log in, browse perfumes by brand, fragrance, category, and price, add products to their shopping cart, place orders, make secure online payments, and track shipments until delivery. The website stores all customer, product, order, payment, and shipment information in a relational database to maintain consistency, reliability, and security. The administrator can manage products, monitor inventory, handle customer orders, and generate business reports.

## **2. Core Business Modules**

- User Registration & Login: Customers create accounts, log in securely, reset passwords, and manage profiles.
- Product Management: Admin adds, edits, deletes perfumes, categories, brands, prices, and stock.
- Product Browsing & Search: Customers search and filter perfumes using various options.
- Shopping Cart & Checkout: Customers manage carts and place orders.
- Payment Processing: Secure payments through UPI, debit/credit cards, wallets, and net banking.
- Shipment Tracking: Customers track order status from dispatch to delivery.
- Customer Reviews: Verified buyers can submit ratings and reviews.

## **3. Actor Profiles**

Customer, Administrator, Delivery Partner, and Payment Gateway interact with the system according to their assigned responsibilities and access permissions.

## **4. Functional Requirements**

The system shall support customer registration, authentication, profile management, product browsing, shopping cart management, online payment, invoice generation, order confirmation, shipment tracking, review management, and notification services.

## **5. Reporting Requirements**

The administrator should be able to generate daily sales reports, monthly revenue reports, inventory reports, top-selling perfume reports, customer purchase history, pending deliveries, cancelled orders, and payment summaries.

## **6. Non-Functional Requirements**

The website should provide fast response time, secure encrypted transactions, responsive design, scalability, reliability, regular database backups, high availability, and protection against unauthorized access.

## **Conclusion**

The Yusuf Bhai Perfume E-Commerce Website offers a complete solution for online perfume shopping by providing secure transactions, efficient order management, and excellent customer experience while helping administrators manage business operations effectively.
